

AGENDA

MISSION STATEMENT

"Our team is dedicated to protecting, enhancing, and developing our rich water resources to the highest beneficial use for Calaveras County, while maintaining cost-conscious, reliable service, and our quality of life, through responsible management."

Regular Meeting Date:
Wednesday, May 27, 2015
9:00 a.m.

Calaveras County Water District
120 Toma Court, (PO Box 846)
San Andreas, California 95249

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the Administration Office at 209-754-3028. Notification in advance of the meeting will enable CCWD to make reasonable arrangements to ensure accessibility to this meeting. Any documents that are made available to the Board before or at the meeting, not privileged or otherwise protected from disclosure, and related to agenda items, will be made available at CCWD for review by the public.

ORDER OF BUSINESS

CALL TO ORDER / PLEDGE OF ALLEGIANCE

1. ROLL CALL

2. PUBLIC COMMENT

At this time, members of the public may address the Board on any non-agendized item. The public is encouraged to work through staff to place items on the agenda for Board consideration. No action can be taken on matters not listed on the agenda. Comments are limited to five minutes per person.

3. CONSENT AGENDA

The following items are expected to be routine / non-controversial. Items will be acted upon by the Board at one time without discussion. Any Board member may request that any item be removed for later discussion.

Nothing to report.

4. REPORTS

General Manager's Report

BOARD OF DIRECTORS

Bertha Underhill, President Terry Strange, Vice President
Jeff Davidson, Director Scott Ratterman, Director Dennis Mills, Director

5. **NEW BUSINESS**

- 5a Introduction of Annual High School Senior Scholarship Award Winners
(Joel Metzger, Community/Customer Relations Manager)
- 5b Direction to Pursue Membership in the Tuolumne-Stanislaus Integrated Regional
Water Management Authority
(Peter Martin, Water Resources Manager)
- 5c Discussion / Action regarding Reinstatement of Annual Dues to the Calaveras-Amador
Mokelumne River Authority
(Peter Martin, Water Resources Manager)

6. **OLD BUSINESS**

7.* **BOARD REPORTS / INFORMATION / FUTURE AGENDA ITEMS**

8. **NEXT BOARD MEETINGS**

- Wednesday, June 10, 2015, 9:00 a.m., Regular Board Meeting
- Wednesday, June 24, 2015, 9:00 a.m., Regular Board Meeting

9. **CLOSED SESSION**

- 9a Conference with Real Property Negotiators (Government Code § 54956.8)
Property: Portion of APN 042-035-003, San Andreas
Under Negotiation: price and terms of payment
Negotiating Parties: Dave Eggerton and Larry Diamond
- 9b Conference with Legal Counsel – Potential Litigation
Government Code §54956.9(d)(4) – one case
- 9c Conference with Labor Negotiators
Management and Confidential Unit
and SEIU Local 1021
Government Code §54957.6
Negotiators: Dave Eggerton and Stacey Lollar

10. **REPORTABLE ACTION FROM CLOSED SESSION**

11. **ADJOURNMENT**

CALAVERAS COUNTY WATER DISTRICT

Board of Directors

District 1 Scott Ratterman
District 2 Terry Strange
District 3 Bertha Underhill
District 4 Dennis Mills
District 5 Jeff Davidson

Legal Counsel

Matthew Weber, Esq.
Downey Brand, LLP

Financial Services

Umpqua Bank
US Bank
Wells Fargo Bank

Auditor

Bryant L. Jolley, CPA

CCWD Committees

*Engineering Committee
*Finance Committee
*Legal Affairs Committee
Highway 4 Corridor Committee (*ad hoc*)

Membership**

Davidson / Underhill (alt. Ratterman)
Underhill / Mills (alt. Ratterman)
Ratterman / Strange (alt. Davidson)
Underhill / Mills (alt. Strange)

Joint Power Authorities

ACWA / JPIA
Calaveras-Amador Mokelumne River Authority (CAMRA)
Calaveras Public Power Agency (CPPA)
Upper Mokelumne River Watershed Authority (UMRWA)

Ratterman (alt. Dave Eggerton)
Strange / Ratterman (alt. Davidson)
Larry Diamond (alt. Dave Eggerton)
Strange (alt. Davidson)

Other Regional Organizations of Note

Mountain Counties Water Resources
Association (MCWRA)
Mokelumne River Association (MRA)
Calaveras County Parks and Recreation
Committee
Tuolumne-Stanislaus Integrated Regional Water
Management Program

Ratterman
All Board Members
Ratterman (alt. Davidson)
Strange (alt. Underhill)
All Board Members

* Standing committees, meetings of which require agendas & public notice 72 hours in advance of meeting.

** The 1st name listed is the committee chairperson.

Project to Lower Intake at Lake Tulloch:

On May 19, 2015, we received conceptual drawings and a preliminary cost estimate to lower the intake at Lake Tulloch from underwater engineering expert John Christensen of Christensen Associates. Totalling \$1,337,003 (including engineering, permitting, materials and construction costs) the preliminary estimate contemplates:

- Two sloping 20 inch diameter casings installed to the bottom of the reservoir (below the reservoir "dead-pool" elevation of 431 feet);
- Three new pumps (2 installed and 1 for standby);
- Pumps mounted on a skid that slides down inside their casing to the screen at the bottom; and
- New motor control centers and controls in the existing pump station.

Christensen is also finishing a second, lower cost option, for the District's consideration which will be in the neighborhood of \$1 million. With the conceptual drawings in hand, Utilities Director Bill Perley is working directly with the manufacturer, based in California, to develop final specifications for the pumps and place our order as soon as possible. We will likely only order the 2 pumps to be installed in the intake as the extra standby pump presents maintenance challenges that outweigh its benefit. According to the estimate from Christensen, each pump will likely cost over \$50,000.

Once we receive the second option from Christensen, we will make a decision on which one to present to the State Water Board Drinking Water Program for drought funding. The final application will be submitted within a matter of days and hopefully a decision on funding will be made by the State shortly thereafter. As soon as we file the final application, I will contact staff for Assemblymember Bigelow and Senator Berryhill to update them on the status of the project and seek their continued support in our effort to obtain funding assistance.

As the Board knows, this project is necessary to prepare for the possibility that water levels at Lake Tulloch may fall below CCWD's existing water supply intake facilities after October 1st. The agreement between downstream purveyors and state and federal agencies regarding storage and water levels at New Melones Reservoir and Lake Tulloch expires at the end of September. Not knowing what will happen to the reservoir level at Lake Tulloch after that date, we are being proactive to protect against any interruption in our delivery of municipal water supplies.

Potential Curtailment of Diversions under Pre-1914 Water Rights:

Earlier this year, State Water Board staff issued notice that pre-1914 water right holders could be curtailed from diverting water under their rights this year in response to the drought. State Board staff has already issued Notice of Curtailment for all post-1914 water rights on the San Joaquin River system, which affects water rights of the District at White Pines Reservoir and Bear Creek. At its meeting on May 20th, the State Water

Board held a public workshop on its drought-related activities, including the issuance of curtailment notices by its staff. CCWD consultant John Mills represented the District at the meeting and discussed the potential curtailment and other potential options available to the State Board. We are in close communication with other senior water right holders on the San Joaquin River system to explore all options to protect the interests of our agencies. The State Water Board appears to be interested in exploring other options to work with water agencies to help address the challenges of drought before their staff moves forward with notice of curtailment for pre-1914 water rights. State Water Board staff were prepared to issue notice of curtailment as early as May 22nd. Hopefully a less draconian and contentious option will emerge in the coming days. We will continue to monitor this situation very closely and update the Board on any new developments.

Website Update:

At the Board meeting, Joel Metzger will update the Board on the launch of the District's new website on June 1, 2015. Joel, John Gomes, and Robbie Creamer have worked hard to make this happen in a very short amount of time with excellent services from local website developer Nhu Design. The new website will prove to be an extremely valuable tool in communicating with the public about important issues such as the ongoing drought and conservation efforts as well as implementation of Rehabilitation and Renovation (R&R) capital projects.

Ordinance to Implement Changes to Board Policy No. 4030:

At its last meeting, the Board directed staff to return with a proposed ordinance to amend the existing Board Compensation and Travel Reimbursement Policy (Board Policy No. 4030) to: reduce the amount of compensation per authorized meeting; eliminate the automatic annual adjustment to the amount of compensation; reduce the number of authorized meetings for which compensation is provided; and update the list of authorized meetings eligible for compensation and reimbursement. Per statutory requirements, advance notice of the hearing on the proposed ordinance is being published in the local newspaper. The public hearing and agenda item to consider the proposed ordinance will be on the agenda for the June 10, 2015 Board meeting. The ordinance would go into effect 60 days after its adoption.

SUBJECT: Introduction of Annual High School Senior Scholarship Award Winners

RECOMMENDED ACTION:

None.

SUMMARY:

During a previous Board Meeting, the Board of Directors approved funding for two \$500 scholarships to be awarded to graduating high school seniors. Students were asked to submit essays that discussed the value of water, conservation and how the drought will impact Calaveras County and the State. A committee of three CCWD staff members reviewed the essays and selected the top submissions. The two award recipients were: Amelia Maurer of Bret Harte High School and Elizabeth Ernst of Mountain Oaks School.

Amelia will be in attendance to read her essay. Unfortunately, Elizabeth could not be here today due to school commitments.

FINANCIAL CONSIDERATIONS:

The cost for the scholarships is a total of \$1,000 and will come from the Water Resources Education budget, Fund 101.

The Importance of Conserving Water

Calaveras County has been experiencing an alarming drought within the last few years that has caused a number of issues. This drought is widespread—throughout at least half of California—and affects how we live and determines how we manage our water sources. The future of California is a mystery, as weather patterns and conservation efforts will reveal whether our beloved home will become a desert state.

In our county, there are many people who are directly and indirectly affected by this shortage of water. Residents of Calaveras County who operate their homes and raise their livestock using wells have found it increasingly difficult to extract water. Cattle farmers have suffered as well, having to buy nearly \$7,000 worth of hay at a time from feed supply stores due to the insufficient growth of grass. Bear Valley Ski Resort has had to manufacture its own snow in order to keep its slopes open, as the winter continues to be a dry one. Lake Melones continues to dwindle in size as the rainless season carries on; however, there have been some rain storms that have given us hope that the lake will once again raise to its amazing stature. As this drought continues on, people all over the county are hoping for rain. In the meantime, residents in Calaveras County have been asked to conserve water.

There are many ways to conserve water, and most are simple and easy to adapt our lives to. One of the easiest ways to conserve water is to check all areas of your house for leaks: pipes, sinks, toilets, sprinkler systems, etc. This prevents all small leaks from growing into large, wasteful problems in the future. Using water cycles for cleaning only when they are full is also a way to conserve water—this means running the dishwasher and washing machine when they are at full capacity. Bathroom routines can be modified with miniscule tweaks to conserve vast amounts of water. Keeping all tissues, cotton swabs, and dental floss out of the toilet would limit the amount of water being wasted—these items belong in the trash, not down the toilet. Dual flush model toilets are also available and should be considered when taking care to conserve water. Taking showers is preferable during a drought season—on average only twelve gallons is used—rather than taking baths, which can use nearly twenty gallons of water at one time. Letting the water run while brushing your teeth, washing your face, or shaving can be a huge waste of water. Being conscious of these times and making sure the water is turned off helps the effort to protect one of our most

important natural resources. Most of these small changes in daily habits happen easily when water conservation is taken into consideration by most, if not all, residents of the county.

The future of water in California is an unbalanced one to say the least. According to the National Weather Service office in Hanford, California, heat waves have made 2014 the warmest year in historical record. If our state receives the estimated total of 18-21 inches of rain the drought will be presumably over; however, the weather patterns have not cooperated with us this last year to provide us with the necessary amount of rain needed in order to end the drought. As water resources become scarcer with every passing year, California may end up funding water treatment plans in order to recycle previously used water by cleaning and removing impurities from the water. The drought in Calaveras County, as well as other parts of California, has affected multiple aspects of our daily lives. It has become such an integral part of living that we don't always realize that the conscious decision to conserve water is imperative to the functions of our lives. The widespread knowledge and cooperation of these conservation efforts has been and will continue to be beneficial to both our county and state alike.

Rivers and streams are the veins and arteries of our lands and without the water that runs through them, life on our planet would quickly perish. The quality of our water and the quality of life are directly connected. Over three billion people worldwide lack clean and properly sanitized drinking water, and this dearth is the world's largest cause of illness. Not only the health of our own species, but all other species of flora and fauna depend upon a safe water supply. Our economy also depends upon a clean useful supply of water, especially the part of the economy revolving around agriculture. As water is used for many products on the market, the availability of water determines how and where businesses can thrive. However, the drought that has been taking hold of California for the past few years has proven that the availability of water is rarely stable. As the aquifers are being sucked dry, the surface runoff is slowing, and the snowpack is disappearing, we witness the water table drastically decreasing. Given that only 0.024% of the water on earth is available for use, species worldwide are threatened by the recent lack of precipitation and the careless water usage caused by humans.

In Calaveras County, our decrease in water supply is very significant especially regarding how it affects our lives on a local level. Except for their monthly bill from the water district office, most citizens in our county have hardly thought about the level of their water supply. This trend seems to be changing, however, as the drought has brought this scarcity to light. The state of California has been in a drought for three years and the state's water deficit is close to 11 trillion gallons. These effects are clearly seen in the Sierra Nevada. The water levels in our reservoirs have decreased

drastically. The water level of New Melones Reservoir has dropped so low that the old snags at the bottom of the lake are emerging. There is controversy over the possible drainage of Lake Tulloch Reservoir between environmentalists and businesses. People who rely on the lake for recreational purposes are arguing against scientists, who discovered that it is essential for the fish in the lower Stanislaus River to have the water continuously flowing. The amount accessible water also affects where and how homes are built and whether or not there is fire protection for these dwellings. During drought years, fire danger increases as water supplies decrease, endangering homes and the environment. Calaveras County has spent millions of dollars to maintain hydrants and pump stations in fire prone areas such as Dorrington. This has been especially important after seeing the effects of the Rim Fire in 2013, which decimated 260,000 acres. Another aspect of the foothills is that many homeowners in the county depend upon private wells as a water source. However, as the amount of groundwater is decreasing, many people are growing concerned and are preparing to dig these wells deeper for water in the near future.

Luckily, people have become more aware of the issues caused by a lack of water and they have began to create changes in their routine to help solve the problem. People have become more conscientious when it comes to how much water they are using while washing dishes or clothes or taking showers. As of July 2014, water customers were asked by the local water district to reduce water consumption by 20 percent and methods for conserving water have been published locally. Some simple methods that can be taken into account in order to conserve water are to pour leftover

water from a water bottle into the garden instead of down the drain, plant plants that do not require a lot of water, and take short showers. Overall, the recent drought has raised awareness for water conservation in the county. It has opened the eyes of many people who did not realize the importance of saving water and taught them ways in which they can conserve one of our most precious natural resources. Small changes in people's behavior and daily routines have saved many gallons of water, and even bigger changes are still being made throughout the country to help solve this issue. Water is one of the most valuable aspects of our earth and preserving its quality is essential for creating a healthy and sustainable environment for future generations.

Agenda Item

DATE: May 27, 2015

TO: Dave Eggerton, General Manager 

FROM: Peter Martin, Water Resources Program Manager 

SUBJECT: *Direction to Pursue Membership in the Tuolumne-Stanislaus Integrated Regional Water Management Authority*

RECOMMENDED ACTION:

Motion: _____ / _____ by Minute Entry to direct staff to formally pursue membership in the Tuolumne-Stanislaus Integrated Regional Water Management Authority Membership.

SUMMARY:

This item is related to the Board's communication to staff of their prospective interest in joining the Tuolumne-Stanislaus Integrated Regional Water Management Authority (T-Stan IRWMA) Board of Directors. We are bringing this item to the Board for their discussion in order to provide direction to CCWD staff on whether to begin formally pursuing membership in the T-Stan IRWMA, which is subject to a set of established processes, protocols, and annual financial contributions.

Two Board designees currently participate in the Watershed Advisory Committee of the T-Stan IRWMA to provide technical input and recommendations to the T-Stan IRWMA. However, CCWD has limited input in the policy or governance of the T-Stan IRWM Region that ultimately resides with the T-Stan IRWMA Board of Directors.

The T-Stan IRWM is organized through a Joint Powers Authority (JPA) and is referred to as the T-Stan IRWMA. Each of the parties to the JPA Agreement share a collaborative spirit and interest in maximizing the beneficial use of water within the Tuolumne-Stanislaus Region. It is to their mutual advantage and the public's benefit to coordinate the implementation and funding of the T-Stan IRWM Plan. For example, the T-Stan IRWM will apply for funding for local projects under the Plan through the grant opportunities to be released by the State under the recently passed \$7.545 billion bond measure (Prop 1). The T-Stan IRWMA is the designated Regional Water Management Group (RWMG) for the entities represented in the Tuolumne-Stanislaus Integrated Regional Water Management Planning area. RWMG's are the recognized IRWM implementation entity according California Water Code (CWC §10539), meaning the

T-Stan IRWMA is tasked with developing and implementing the T-Stan Integrated Regional Water Management Plan, reviewing projects submitted to the plan, and choosing which projects to put forward for grant funding.

Should the Board decide to pursue membership, CCWD staff will work with the administrative staff of the IRWMA to place an item on their June 17th, 2015 agenda to declare CCWD's intent to join the JPA and request a formal motion from the IRWMA accepting CCWD's qualifications as a member of the JPA. Staff would then bring an item forward to the CCWD Board at a later date yet to be determined for a formal resolution to join the JPA, establish designees to the T-Stan IRWMA Board of Directors, and provide financial contributions to the T-Stan IRWMA for Fiscal Year 15/16 not to exceed the amount of \$9,961.20 according to the attached IRWMA budget and workplan.

FINANCIAL CONSIDERATIONS:

Should the CCWD Board agree to pursue membership in the T-Stan IRWMA, CCWD staff will work with the T-Stan Board and administrative staff set in motion the above mentioned formalities associated with CCWD's membership in the JPA. Additionally, an amount not-to-exceed \$9,961.20 will be designated in the Water Resources Program Budget for Fiscal Year 2015/2016 for this expenditure.

Agenda Item

DATE: May 13, 2015

TO: Dave Eggerton, General Manager 

FROM: Peter Martin, Water Resources Program Manager 

SUBJECT: Reinstatement of Annual Member Agency Dues to the Calaveras-Amador Mokelumne River Authority

RECOMMENDED ACTION:

Motion: _____ / _____ by Minute Entry to approve the amount of \$13,854 for 2015-2016 Member Dues to the Calaveras-Amador Mokelumne River Authority (CAMRA); funds to be included in the District's FY 15-16 budget.

SUMMARY:

This item is related to the Board's ongoing participation in the Calaveras Amador Mokelumne River Authority. At the March 18, 2015 CAMRA Board Meeting, it was agreed that a proposal for the reinstatement of annual member agency dues for future efforts should be developed. At the May 20, 2015 CAMRA Board Meeting, the Board approved a member agency developed proposal to reinstate member agency annual dues. The approved proposal was for the CAMRA member agencies to collectively fund a total FY 2015-2016 budget of \$75,000; minus the carryover balance of \$17,278.

The May 20, 2015 CAMRA action requires each member agency to go their individual boards in order to indicate their willingness to fund the proposed annual CAMRA dues for Fiscal Year 2015-2016. The proposal is based upon anticipated needs for CAMRA to support the protection of "area of origin" water rights to the Mokelumne River. The proposal includes a funding breakdown amongst CAMRA's member agencies and is based upon a modified version of the Upper Mokelumne River Water Association's annual dues cost sharing formula; the difference being that it doesn't include East Bay Municipal Utilities District as they are not a participant in CAMRA. Amador and Calaveras would split the costs 50/50 with the modified funding formula being applied across their respective member agencies. CCWD's contribution would be 24% of the total \$75,000 budget (minus the carryover), for a total of \$13,854. The attached memo to the CAMRA Board Members lays this out in greater detail. Any annual dues in the future would need to be reassessed based upon a new budget and approved by the CAMRA Board in March of each year. Therefore, this funding amount and formula is proposed only for the anticipated CAMRA work in Fiscal Year 2015-2016.

FINANCIAL CONSIDERATIONS:

Should the CCWD Board agree to support CAMRA's proposal to reinstate annual dues according to the suggested member agency funding formula, an amount not to exceed \$13,854 will be designated in the Water Resources Program Budget for Fiscal Year 2015/2016 for this expenditure.

Attachment:

- May 7, 2015 Memo to CAMRA Board Members outlining a proposal for Reinstating Member Agency Dues

CAMRA

Memo

To: CAMRA Board Members
From: Rich Farrington
cc: Gene Mancebo, Dave Ortegel
Date: May 7, 2015
Re: Member Agency Dues Reinstatement Proposal

Enclosed is the proposal for Reinstating Annual Member Agency Dues that I agreed to develop at the March 18, 2015, CAMRA meeting. This proposal is based on the motion adopted by the CAMRA Board at the December 17, 2014, meeting for \$75,000 budget. With no timeframe clearly identified in that motion, I assumed that it is based on one year from adoption. I also assumed this proposal includes the CAMRA balance of \$17,278 reported at the March 18, 2015, CAMRA meeting, so the net total is \$57,722.

This proposal uses the UMRWA breakdown minus EBMUD for 2015-16 Member Dues. Dues for each future year would be set based on a budget for each year approved by the CAMRA Board by March of each year.

I propose an equal split between Amador and Calaveras Counties, and then further broken down as follows (however, individual counties could modify cost sharing within each county).

CAMRA 2015-16 MEMBER AGENCY DUES BASED ON A BUDGET OF \$75,000

| ITEM | PERCENTAGE | AMOUNT (ROUNDED) |
|--------------------------------------|------------|---------------------|
| CAMRA 2015-16 BUDGET BALANCE | 100% | 75,000 |
| CAMRA BALANCE AS OF 3-18-2015 NET | 100% | (17,278) 57,722 |
| AMADOR TOTAL | 50% | 28,861 |
| AMADOR COUNTY | 23% | 13,276 |
| AMADOR WATER AGENCY | 23% | 13,276 |
| JVID | 4% | 2,309 |
| CALAVERAS TOTAL | 50% | 28,861 |
| CALAVERAS COUNTY | 15% | 8,658 |
| CALAVERAS COUNTY WATER AGENCY | 24% | 13,854 |
| CALAVERAS PUBLIC UTILITY DISTRICT | 11% | 6,349 |
