

TRANSFORM YOUR YARD

PLANT NATIVE WATERWISE PLANTS

- Decorate your yard with low-maintenance, waterwise plants.
- Pick plants that will grow well in your climate.
- Native Plants to consider: Cacti, California Poppies.
- Waterwise plants: Lavender, Rosemary

MULCH YOUR GARDEN AND FLOWER BEDS

- Mulch can be made up of a variety of materials including: wood chips, bark, straw, and compost.
- Mulch retains soil moisture, reducing evaporation.
- Mulch allows you to water your garden less often.
- Mulch helps prevent weeds from growing!

INSTALL DRIP IRRIGATION

- More efficient than traditional sprinklers.
- Delivers water directly to the roots reducing water waste due to evaporation or runoff.
- Helps prevent overwatering.
- Waters plants slowly and efficiently.

DITCH YOUR LAWN

- Lawns are thirsty and require lots of water to maintain.
- Thirsty lawns are also expensive costing us money and using up valuable water resources.
- Consider replacing your lawn with waterwise and native plants or landscaping that doesn't require any water (xeriscaping)
